

ACCOUNTING CONSULTANT / REGULATORY PROJECT

Command Strategy (CS) is a financial consulting firm supporting professionals in the financial sector (insurance, banks, asset managers, asset servicers, etc.) by offering recognized expertise in both consulting and financial services. A leader in its field, the firm provides its clients with triple expertise in Finance, IT systems, and Project Management.

Command Strategy offers its consultants multiple opportunities with a variety of clients and projects. A dynamic and fast-growing firm, CS is seeking several junior and experienced profiles to work on regulatory issues (UCITS, FATCA, IFRS 9, KYC, BASEL III...), on accounting closure projects, or projects related to evolving business processes and IT systems due to new norms and regulations.

Job Description :

As part of our activities, we support our clients during accounting closings, ongoing regulatory and normative changes, or changes to information systems (IS).

You will join a team of experienced consultants and financial engineers recognized for their expertise and will assist our clients in implementing various regulatory projects. You will contribute to two types of assignments:

1/ Support in the production of regulatory reports:

- Support in production work:
 - Regulatory reports: FINREP, SURFI, COREP, LCR, NSFR, Regulatory data collections...
 - Regulatory ratios: Solvency, Leverage, etc.
- Implementation of new regulatory developments
- Development of dashboards and projected indicators
- Regulatory monitoring: RUBA, Basel III v2...
- Drafting user documentation

2/ Project:

- Assistance with project management for integrating new needs into various financial IS systems
- Implementation and configuration of regulatory production tools
- Participation in steering committees and framing/redesign workshops, analytical architecture
- Drafting business requirements, functional specifications, or design documents
- Strategy definition and execution of test plans
- Coordination and execution of functional and integration testing (end-to-end)
- Supervision and organization of data migration and reconciliation

Profile Required :

- Graduate with a Bac +5 (Master's degree) in accounting (Business School, Master's in Accounting, DSCG)
- You have prior professional experience in banking accounting and regulatory reporting
- You've worked on projects involving regulatory changes (IFRS 9, Basel III), and you wish to continue developing your skills in a dynamic environment, with a strong interest in teamwork
- You're responsive, rigorous, and analytical, with a strong attention to detail
- You have solid knowledge of banking regulations and mastery of regulatory ratios
- Fluent English is a plus
- Strong command of office tools and accounting software (SAP, SAGE (1000, XRT), ORACLE CLOUD, AXWAY, NetSuite...)
- Familiarity with reporting tools (Evolan Report, Invoke) is essential
- Knowledge of consolidation (SAP BFC...) and treasury tools (KYRIBA, EXABANQUE...) is a plus
