

INTERNSHIP / PERMANENT CONTRACT – FULL STACK FINANCE DEVELOPER

Command Strategy, a financial consulting firm founded in 2017, provides financial institutions with highly sought-after expertise in consulting and service delivery. Covering the entire consulting chain—from strategic analysis to implementation—we bring our clients strong dual expertise in finance and project management.

A dynamic and fast-growing firm, **Command Strategy** is seeking an experienced profile to strengthen its teams.

Job Description :

Command Strategy is looking to strengthen its team with a Full Stack Developer with advanced knowledge in C# and/or Python. You will contribute your expertise to propose innovative solutions that help clients solve financial challenges.

Throughout your missions, you will work with various tools and IT technologies, such as:

- Web Frameworks: .NET, Django
- ETL tools: SQL Server Integration Services (SSIS), Alteryx, Knime
- Reporting tools: SQL Server Reporting Services (SSRS), Excel (VBA), Power BI / Power Apps
- Database Management: SQL Server Management Studio, Oracle
- Schedulers: VisualCron, Power Automate
- Project Management: Azure DevOps, Jira

Your responsibilities will include:

- Manipulating and querying databases
- Writing back-end code and querying databases to address financial issues
- Coding calculation services while applying best practices (object-oriented programming, naming conventions, parallel processing, etc.)
- Integrating front-end code using HTML, CSS, and JS to enhance the UI and UX of web solutions
- Adhering to security standards to ensure data integrity for clients

You will discover this environment as part of a dynamic team with diverse profiles who will help you develop cross-functional knowledge in Asset Management, Risk Management, Accounting, Data Science, etc.

Profile Required :

- You are a recent graduate or looking for an internship, currently studying at an engineering school and/or university with a specialization in IT and Finance. You may be a beginner or have prior experience in the IT department of a bank or insurer.
- You have:
 - Autonomy, particularly in web development with a Full Stack approach
 - Knowledge of Django or .NET frameworks and related ORMs, especially in the MVC (Model-View-Controller) model
 - Database and relational data skills
 - Strong writing skills and attention to detail
 - A curiosity and appetite for new technologies (Blockchain, Data Science)
 - Knowledge of financial tools like Fusion Invest, Efront, or Simcorp Dimension is a plus
