

LIFE ACTUARIAL CONSULTANT – SPECIALIZED IN INVENTORY / PRODUCT / REGULATIONS

Command Strategy (CS) is a financial consulting firm founded in 2017 that provides financial institutions with sought-after expertise in consulting and service delivery. Covering the entire consulting chain, from strategic analysis to implementation, we bring our clients triple expertise in finance, IT, and project management.

A dynamic and fast-growing firm, **Command Strategy** is seeking experienced professionals to expand its teams.

The Actuarial & Modeling Services (AMS) team, composed of actuaries, statisticians, and engineers specializing in finance and modeling, works with both insurance service providers (insurance companies, mutuals, provident institutions, reinsurers, etc.) and asset management firms (asset managers, asset servicers, etc.), supporting them in their actuarial work.

To strengthen the AMS practice, Command Strategy is looking for a **Life Actuarial Consultant**, specialized in **Inventory/Product/Regulatory**, with **3 to 5 years of experience**.

Job Description :

The consultant will be involved across the entire actuarial value chain, including:

- Product actuarial work, pricing, inventory, etc.
- Asset-Liability Management (ALM), Risk Management
- Regulatory work in the life insurance context: French GAAP, Solvency II, IFRS 9/17, etc.
- Modeling, production, automation, and analysis of quantitative indicators (performance, risk, financial and extra-financial indicators)
- Supporting asset management companies in their collaboration with insurance stakeholders (regulatory requirements, transparency reports, etc.)

Profile Required :

- You hold a degree in actuarial science (Master's from a university program or a degree from a top engineering school), ideally accredited by the Institute of Actuaries
- You have proven actuarial experience in life insurance, with a particular interest in Inventory and/or Product Actuarial topics
- Solid understanding of life insurance regulatory issues (French GAAP, Solvency II and/or IFRS 17) is highly appreciated
- Proficiency in office tools, especially Excel and VBA
- Initial experience in programming languages (Python, R, SAS, C#, etc.) and/or actuarial software is a plus
- Strong interpersonal skills, the ability to thrive in a French-speaking professional environment, and a balance of rigor, autonomy, and teamwork
- You're eager to join a dynamic, people-focused firm, contribute to its growth, and evolve with it
