

FINANCIAL ENGINEER

Command Strategy, a financial consulting firm founded in 2017, provides financial institutions with sought-after expertise in consulting and service delivery. Covering the entire advisory chain — from strategic analysis to implementation — we bring our clients a dual expertise in finance and project management.

A dynamic and fast-growing firm, **Command Strategy** is looking for junior or experienced profiles to strengthen its teams.

Job Description :

As part of our activities, we support our clients through strategic, operational, and organizational transformations driven by a constantly evolving regulatory environment (Basel III, IFRS 9, Solvency II, IFRS 17...).

You will join a team of experienced consultants and financial engineers recognized for their expertise, and assist our clients in the implementation of various projects involving listed and unlisted financial investments. As such, your responsibilities will include:

- Supporting clients in the selection and deployment of financial software solutions
- Assisting with project management for the integration of new business requirements into financial information systems
- Implementing regulatory changes and assessing their strategic, system, and operational impacts
- Validating financial indicators and/or insurance calculations under various standards (FGAAP, IAS 39, IFRS9)
- Setting up reconciliation tools and validating financial ratios
- Producing financial, accounting, and regulatory reports
- Writing user documentation and training business teams
- Collaborating with other departments such as investment, risk, ALM, accounting, etc.

Profile Required :

- You hold a Master's degree (Bac +5) in Finance (engineering school, business school, or a Master's in financial markets, asset management, or risk management)
- You have initial experience in a similar position and wish to further develop your skills in the field
- You're proactive, rigorous, and have strong analytical skills
- You have knowledge of financial instruments and valuation techniques
- You understand financial models and are proficient in insurance calculations
- Familiarity with asset management tools and data providers is a plus
- Professional English is required
- Proficiency with office tools is essential
- Strong interest in teamwork
